in everything we deliver

Our *Work* Speaks Its Value  
Our *Product* Shows Their Value  
Our *Process* Keeps Its Value  
Our *Efforts* Prove Its Value

the *Genesis* of excellence

SWASTIK PLYBOARD LTD. is one of the dominant manufacturers of quality plywood in India. The company was established in 1996 by highly qualified and acknowledged professionals in Jaipur (Rajasthan). With continuous achievements to supply superior quality merchandise and extensive maturity in the wood industry, the company has gained a momentous stand and an ambitious authority in the market.

With the support of a strong team today, SWASTIK PLYBOARD LTD. is recognized for its superior quality products all over the world.

our *Pledge*

At SWASTIK PLYBOARD LTD., customer always comes first! Our professional team is equipped with the latest technology and unparalleled product knowledge to meet your specific needs. We always work hard to ensure that you are satisfied with your purchase and that SWASTIK PLYBOARD LTD. becomes your preferred source of quality plywood and other related products.

 We understand your dreams and know how much they mean to you, that is why we take care to ensure quality products are delivered to you every time. Our product will endure for long, after your dreams have become true. 

- M. C. Jain  
(Chairman, Swastik Plyboard Ltd.)

## superior *Quality* naturally

Our products are natural, strong, sturdy and made with a passion for pure lines and respect for the wood itself. Our timeless, stunningly simple collection can be found in the most diverse interiors all over the world where they only become more beautiful as the years go by.

Our quality not only conforms to the standards set by Bureau of Indian Standards (BIS) but also matches to the standards set by International Organizations like ISO, CE and FSC certification body. The CE Mark certifies that our products comply with the standards set by the European Union.

## in *Harmony* with nature

Besides providing superior quality plywood to our customers, we take environmental issues determinedly. The timber logs used to produce plywood and its allied products are utilized to their optimum yield which helps us in reducing wastage of the valuable natural resources. In a step towards promoting green construction we have become a member of Indian Green Building Council (IGBC) which is one of the respectable agencies that promotes green buildings in India.

## research *And* development

Our R&D team is dedicated in flourishing new and innovative mechanism for wood based industry. In order to reduce pressure on natural forests and to help our Mother Earth in retaining its green cover, we have materialized diverse techniques developed by the R&D team to advance the plywood manufacturing process to yield superlative profit with minimal timber usage. In addition, the finished products are also regularly tested in well equipped modern laboratory for its properties like tensile strength, moisture content, glue shear strength etc.

## our range of *High Quality* products

We manufacture and market homogeneously made interior and exterior infrastructure products such as Plywood, Block Board, Flush Door, Shuttering Ply, Marine Ply, Hi-Tech Ply, Flexi-Ply and Decorative Veneers and Boards to cater to different market segment under the brand name "**SWATI**".

An obsessive commitment to excellence that allows us to offer unequalled quality and the industry's best service, and to remain a tremendous resource, not only for our customers, but also for the environment.

### SWATI HI-TECH PLY (IS 710)

Swati Hi Tech Ply is manufactured from selected 100% Dipterocarpus species. Veneers used in this ply are peeled from hardwood plantation and treated with specially manufactured Boric Borax solution in addition to Glue Line Position (GLP) for longer durability and better performance. The entire process of manufacturing veneers plates is completed in-house using modern and well-equipped plant. The increased number of veneer layers ensures long life of the product and gives extra strength and dimensional stability in hard wood working surroundings.

In case of any termite action or performance issues, we promise to compensate our customers **3 times** the value of plywood used in the furniture. Hi Tech ply is an ideal selection for making furniture, doors etc.

## SWATI MARINE PLY (IS 710)

At Swastik Plyboard Ltd., we live for challenges and opportunities and so does our "Marine Plywood" which faces the challenges of sea every day. It is strong enough to withstand excess load, thrust and vibrations. This product is manufactured from 100% hardwood and imported tropical wood i.e. GURJAN and KEURING and is bonded with undiluted Phenol Formaldehyde Resin at extremely high temperature and pressure to ensure that on application, it can withstand high stress and strain.

This product is the ideal choice in making boats, boat dock, furniture, bathroom walls.

## SWATI SHUTTERING PLY (IS 4990)

Swati Shuttering Plywood is manufactured by high density timber like Gurjan and other hardwood species in ultra modern hot presses. The layers are bonded with phenolic resin and imported superior quality film is used on both sides to give it a mirror look and smooth surface. Our shuttering ply is widely known for the maximum repetitions it gives.

Weight : 30Kg., 34Kg. and 38 Kg.

## SWATI BWP & MR GRADE HARD WOOD PLY (IS 710, 303)

Swati BWP & MR grade quality plywood comes from the manufacturing house where quality is a tradition. The International Glue Line Technology (GLT) ensures that the plywood is 100% borer proof. BWP grade ply is Phenol Formaldehyde Melamine resin bonded and MR grade ply is bonded by Urea Formaldehyde resin.

The bonding under high temperature and pressure ensures that the plywood will remain intact where high dimensional stability, strength and durability is required.

## SWATI SHUTTERING PLUS PLY (IS 4990)

Swati Wire Mesh plywood is impregnated with high solid content phenol formaldehyde resin and compressed under high pressure and controlled at 150 C temperature. High quality S-S ductile metal with fine knitting wire mesh is reinforced in central line of impregnated veneers to give it dimensional stability and strength.

Our wire mesh plywood has been designed for the utilization in automotive engineering, fly ash brick industry, brick industry, railway coaches, bus coaches, flooring and side walls.

Thickness : 19mm, 25mm, 30mm

## FLEXI PLY

Swati Flexi ply is used extensively in furniture and shop fitting, wherever curves are desirable, thus demanding a panel that is extremely flexible. We manufacture Flexi Ply from specially treated veneers, usually with a thinner central core veneer and two thicker 'tenderized' face veneers. Our plywood has a large degree of flexibility that offers the most cost-effective way of producing rounded columns and other curved structures of small radius in rounded or S-shaped structures without water or the need for heat-forming.

Our Flexi Ply is more convenient and much lower in cost than premade wooden forms, as this flexible plywood will hold its shape once it is glued, laminated or veneered.

## TEAK PLY, BOARDS & DOORS

Swati Teak Ply & Board are manufactured using superior quality teak face veneer with the help of latest technology in adherence to the set industry standards. Our Teak Ply & Board are widely appreciated in the market for its characteristics like perfect finish, smooth texture, scratch resistance, termite proof nature and durability. The superior finish of the surface gives a natural edge over other products in creating elegant & functional interiors of classic imagination. Teak Ply & Board is ideal selection for Furniture, Wall Panelling, Partitions, Ceilings and Decorations.

Swati Teak Door are Aesthetic, highly sturdy, Water Resistant, Termite Proof, weather Proof and bore proof. Moreover these are Elegant and affordable in rates.

All the products come with an option of one side and both side teak wood veneers.

Standard Sizes (in cm)		
244 x 122	244 x 92	214 x 122
214 x 92	184 x 122	184 x 92

Teak Doors are available in 25mm, 30mm and 35mm

## BWP & MR GRADE BLOCK BOARD (IS 1659)

We are the manufacturer of quality BWP & MR Grade Block Board available in the market. Kiln seasoned and best quality wood is used to manufacture quality acclaimed block boards.

The block boards are bonded with phenol formaldehyde melamine resin to give superior bonding in its grade thus, ensuring high mechanical strength and screw holding capacity. The boards acknowledged for its termite resistance nature and impeccable strength are used in making all types of Furniture, Cupboards, Shelves, Partitions, Railway coaches, Bus bodies, Flooring etc.

## FLUSH DOOR (IS 2202,PART 1)

Face veneers and Cross bands are made from selected imported hardwood timber which are uniformly dried to optimum moisture. Kiln seasonal stiles and rails are treated to improve its natural durability.

Our exceptionally durable and dimensionally stable Flush Doors are bonded with superior grade Phenol Formaldehyde Resin and we use seasoned and chemically treated timber to make them even stronger. Our array of flush doors is a perfect solution to areas that demand something sturdier to combat climatic & work area hazards. We offer Flush Doors in a variety of designs, finishes, colors etc.

NEW

# DECO PLY

## SWATI DECO PLY (IS : 710)

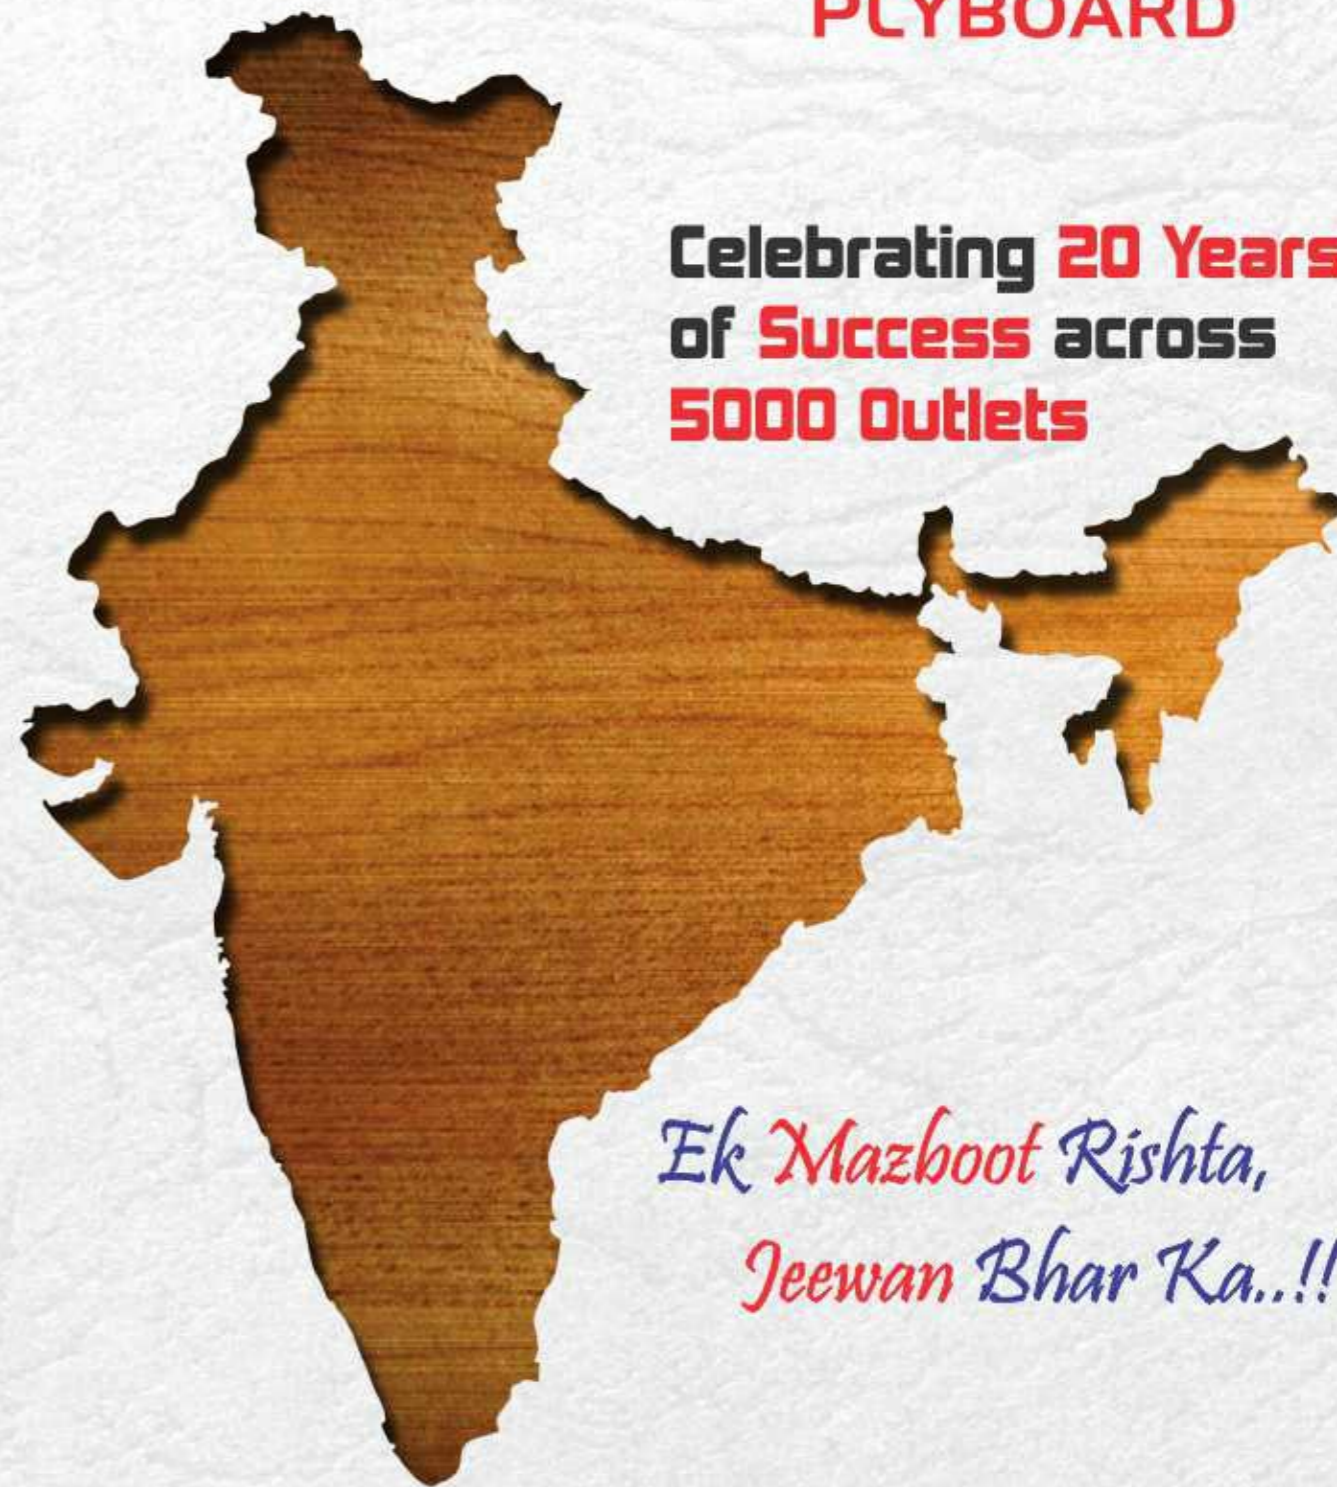

With enhanced and superior technological support and usage of 100% imported wood, SWATI DECO PLY has been made to leave a significant mark in the plywood industry. The decorative, smooth and superior surface has made the product ready to use which helps in giving the shape to your elegant imaginations and gives you cost effective solution by cutting cost on laminates and veneers.

This innovative product with superior built and structural strength guarantees extra resistance, easy and precise workability, excellent finish and stability. Its resistance to termites, fungus and other destructive insects makes it the ideal choice for home and offices.
